TECHNICAL **DATA SHEET**

HYGIENIC BLUETOOTH KEYBOARD

DESCRIPTION

Our glass keyboards are anti-bacterial and can be sterilised by various kinds of disinfectant. They are waterproof in order to make it easier for you to stay safe and germ-free at work. This is especially suitable for sterile surgeries or laboratories where keeping things clean is vitally important. The lack of crevices and gaps between keys also help keep your keyboard clean. With a simple keyboard shortcut, the wipeable keyboard also functions as a mouse touchpad meaning all your desktop needs are met with one simple device. With its LED backlight, it is also suitable for low light environments, making it the perfect keyboard for laboratory and cleanroom environments.

TECHNICAL SPECIFICATION

Weight	0.87kg
Dimensions	436x160x20mm
Interface	USB, Bluetooth & RF via Dongle (supplied)
Material	Tempered Glass & Rugged ABS Case
Colour	White
Key/ Button Size	18x18mm
