

TECHNICAL DATA SHEET

Anigene Animal Health Disinfectant Wipes

DESCRIPTION

For infection control, cleaning and disinfecting surfaces in animal habitats. Effective against viruses, fungi, bacteria and bacterial spores. The formulation can be used in general conditions, high risk areas, on bedding and against airborne pathogens. Nonwoven wipes offer unrivalled strength, absorbency and low lint properties as a cost effective price. The wipes are impregnated with a multi-active, alcohol-free disinfectant solution that provides efficacy against a broad spectrum of micro-organisms, including enveloped and non-enveloped viruses.

TECHNICAL SPECIFICATION

Quantity	200 wipes per tub
Test Standards	EN 1276 (bactericidal) EN 1656 (bactericidal) EN 13727 (bactericidal) EN 13623 (bactericidal) EN 13697 (bactericidal, yeasticidal, fungicidal) EN 14476 (Fungicidal) EN650 (virucidal) EN 14204 (Mycobactericidal)

FEATURES

- Floors, walls and unoccupied animal habitats
- High risk areas including worktops, sinks and animal housing
- Airborne pathogens
- Animal bedding
- Powerful disinfectant
- Non-corrosive
- Alcohol free
