

TECHNICAL DATA SHEET

Anigene Animal Health Surface Disinfectant

DESCRIPTION

For infection control, cleaning and disinfecting surfaces in animal habitats. Effective against mycobacteria, viruses, fungi and bacteria. The formulation is biodegradable under OECD conditions and is non-corrosive. Can be used in general conditions, high risk areas, on bedding and against airborne pathogens. Products are tested and developed in laboratories and in real-world conditions to make sure they perform to the highest standard.

TECHNICAL SPECIFICATION

Quantity	1 x 5L bottle
Scent	Unscented
Material Feature	Biodegradable
Recommended Use	Wash down floors walls and animal habitats (unoccupied)
Shelf Life	Unopened concentrate is 3 years self life, reduced to 3 months once opened and diluted. Factory diluted product is 2 years from manufacture
Test Standards	EN 13697 (Bactericidal, yeasticidal, fungicidal) EN 1650 (fungicidal) EN 14476 (virucidal) EN 14204 (mycobactericidal) EN 1276 (bactericidal) EN 1656 (bactericidal) EN 13727 (bactericidal) EN 13623 (bactericidal)

FEATURES

- Powerful disinfectant
- Effective against a range of micro-organisms
- No rinsing required
- Tested to veterinary standards

TECHNICAL DATA SHEET

Anigene Animal Health Surface Disinfectant

This product has been tested effective against:

Fungicidal Activity

- Trichophyton Rubrum
- Microsporum Canis

Virucidal Activity

- Canine Parvovirus
- FIV
- FIP
- Feline Calicivirus
- Hepatitis
- Herpes
- Enclosed Viruses (such as SARS-CoV-2)

Bactericidal Activity

- Bordetella bronchiseptica
- Rhodococcus equi
- Escherichia coli
- Methicillin-resistant Staphylococcus aureus
- Methicillin-resistant Staphylococcus pseudintermedius
- Staphylococcus aureus
- Pseudomonas aeruginosa
- Enterococcus hirae
- Legionella pneumophila
- Listeria monocytogenes
- Salmonella typhimurium
- Streptococcus equi
