

# TECHNICAL DATA SHEET

## Bulk Handling Clinical Waste Bags

### DESCRIPTION

For bulk transportation of infectious waste which is to be taken for incineration or sent for alternative treatment. Supplied in rolls to fit dispensers. These bags are required as stated in the European Agreement concerning the International Carriage of Dangerous Goods by Road. Bulk carriage bags enable the transportation of dangerous goods without the use of rigid outer containers in appropriately equipped vehicles. These bags are not suitable for non-infectious waste, anatomical waste, placental waste, cytotoxic/cytostatic waste or domestic waste.
