

TECHNICAL DATA SHEET

Cleanroom Motor Protection Filter

DESCRIPTION

Replacement polyester motor protection micro filter for cleanroom vacuum cleaner. The microfilter is a pre-filtration step that protects the motor and acts as a barrier to even bacteria-size particles. To ensure that your Nilfisk vacuum cleaner delivers the years of trouble-free operation for which it was designed, it is necessary to check and replace filters regularly. Refer to your owners manual for replacement filter instructions and maintenance information.

TECHNICAL SPECIFICATION

Material	Polyester
Shelf Life	3 months
Product Code	11730410

FEATURES

- Each package contains one replacement Nilfisk Microfilter
- The recommended replacement schedule for this product is every 3 months or when discolouration is noticeable
