

TECHNICAL DATA SHEET

Cleanroom Vacuum Cleaner Cotton Filter

DESCRIPTION

Cotton primary filter for Nilfisk GM80P Cleanroom Vacuum Cleaner. The filters in your vacuum cleaner play an integral part in its life. Their purpose is to collect the dust that passes through the suction nozzle from the floor. If you find that dust is escaping your cleaner, then the filters may be clogged. If this happens the vacuum cleaner's motor can become overheated as dust particles are not filtered out and make their way into the motor. To prevent this, you need to change the filter regularly.

TECHNICAL SPECIFICATION

Material	Cotton
Filtration	Retains 99.8% of particles $>3 \mu\text{m}$
Compatibility	Nilfisk GM80P Vacuum Cleaner

FEATURES

- 2 year warranty
- Retains 99.8% $>3 \mu\text{m}$
- Compatible with GM80P vacuum cleaner
