

# TECHNICAL DATA SHEET

## Disposable Plastic Isolation Gowns

### DESCRIPTION

Single-use, impervious polyethylene (PE) isolation gown featuring an over-the-head style design for excellent protection against liquids and fluid exposure. Resistant to wet bacteria, contaminated solid particles and liquid penetration. Ideally suited for use in infective wards, ICU and emergency care settings. The design ensures that the gown remains securely in place while in use thanks to thumb loops, which prevent sleeves from rolling up. The one size fits all gowns come individually folded and wrapped in a dispenser box.

### TECHNICAL SPECIFICATION

Material	Polyethylene
Sterility	Non-sterile
