

# TECHNICAL DATA SHEET

## Dycem™ Cleanzone Floating Floor

### DESCRIPTION

Dycem floating floor mats are high performance, antimicrobial loose-laid mats offering many of the same benefits as Dycem CleanZone flooring without the need for permanent installation. A floating floor can be placed over smooth or rough subfloors and can be self-installed with ease. The underside of the floating is an impervious vinyl layer resistant to moisture, which is non-absorbent and contains multiple peduncles in order to minimize sub-floor show through and maintain rigidity of the Dycem product.

### TECHNICAL SPECIFICATION

Material	Dycem
Thickness	1.58mm
Shelf Life	3 years from manufacture
Size	2000mm x 1200mm (bespoke sizes available)
Recommended Use	At pedestrian entrances and exits, inside air locks, gowning rooms, air showers and material transfer areas. In hallways and critical areas

### FEATURES

- Pre-assembled
- Adhered onto 1.58mm thick isolator membrane
- Impervious vinyl underside for moisture resistance and rigidity
- Available in a range of colours for colour-coding
- 12-month warranty from date of installation
- Long lasting and cost effective
- Easy to clean
- Washable and reusable
