

TECHNICAL DATA SHEET

Flat Mop Head & Telescopic Handle

DESCRIPTION

Whether in a cleanroom, laboratory, surgery room or any other critical application, our high quality folding cleanroom mop cleans floors, walls and other surfaces efficiently and is designed for ease of use. For efficient cleaning. The mop head includes a high quality telescopic pole to allow adjustment for the user. Manufactured from strong and durable components, the system is designed with minimal crevices. Equipped with 2 grey plastic clips to enable a better grip and to avoid direct contact between the operator's hands and the aluminium. The end of each handle is colour coded for specific areas to prevent cross contamination.
