

# TECHNICAL DATA SHEET

## Heavy Duty Clear Waste Compactor Sacks

### DESCRIPTION

A tough and dependable refuse sack for industrial or commercial waste. Made using heavy-duty recycled polyethylene, the sacks are large, strong and resistant to stretching, tearing and piercing, creating an effective barrier between waste products and their containers. These sacks are clear, making it easier to segregate waste. Their durability makes them a good option for applications where standard refuse sacks are unable to provide the strength you require. Suitable for both domestic and commercial uses. **These sacks are suitable for use with both our Floor Standing Cleanroom Pedal Bins and Wall Mounted Knee-Operated Bins.**

### TECHNICAL SPECIFICATION

Quantity	Case of 100
Usage	Education, healthcare, janitorial, manufacturing, building and local authority
Bag flat dimensions	850mm x 1168mm
Thickness	250 gauge (63.5 µm)

### FEATURES

- 250 gauge (63.5 µm) thickness
- Flat Dimensions 864mm W x 1168mm H (508mm top diameter when opened)
- Case of 100 (4 folds x 25 pieces)
- Clear for easy waste segregation
- Durable - resistant to stretching, tearing and piercing
- For industrial, commercial and domestic use
