

# TECHNICAL DATA SHEET

## Hypochlorous Acid Disinfectant– Non-Sterile

### DESCRIPTION

A natural and safe disinfectant solution that kills up to 99% of bacteria, viruses, fungi and spores. Generated by a specialist process of electrolysis using water and salt, this product is 100x more efficacious than bleach but completely safe for humans, animals and food-related processes. The active ingredient, Hypochlorous Acid (HOCl), breaks down the cell walls in pathogens instantly, before destroying unhealthy bacteria on contact, leaving very little chance for bacteria to multiply and infection to spread. This product can be used in many environments due to its effectiveness and safety.

### TECHNICAL SPECIFICATION

Quantity	16 x 300ml atomiser 10 x 500ml trigger spray 2 x 5L bottles
Shelf Life	12 months from manufacture
Usage	Healthcare, nursing homes, dentistry and veterinary

### FEATURES

- Supplied non-sterile
- Kills 99.99% of bacteria, viruses, and fungi
- No hazard classification
- Bottles individually bagged
- Not classed as corrosive
- Ready to Use
