

TECHNICAL DATA SHEET

I-Tack Super Wipes

DESCRIPTION

The I-Tack Super Wipes are more durable than the regular I-Tack wipes, making them more efficient. Designed to swiftly and cleanly remove contaminants, the I-Tack wipes contain a water-based tackifier. They do not dry out like traditional tack cloths, making them last longer. The cloths are designed for dust removal on smooth or glazed surfaces, without the need for cleaning solutions. They offer solvent free cleaning, with no unpleasant smells or sticky residue on either your hands or the surface.

TECHNICAL SPECIFICATION

Quantity	Pack of 25
Wipe Size	610mm x 370mm
Sterility	Non-sterile
Colour	Green
Recommended Use	Cleanroom glazing, composite manufacture, coatings, laminating & material preparation processes

FEATURES

- Silicone Free
