

TECHNICAL DATA SHEET

Stainless Steel Flat Head Mop For PRE Wetted Wipes

DESCRIPTION

A stainless steel mop head specifically designed for maintaining cleanliness in critically controlled environments. The polished stainless steel frame ensures optimum levels of cleanliness, with low particulate levels and strong chemical resistance. The solid base of the mop head means that the mop glides easily over smooth surfaces. Suitable for use with a range of wipes. Simply click the handle on to the mop head to assemble. To extend or shorten the handle, twist the top half anti-clockwise to loosen it, slide it to the desired length and then twist clockwise to tighten it again.
