

TECHNICAL DATA SHEET

Sterile Optimum Flat Mop Covers

DESCRIPTION

These mop covers are designed for ease of use with our flat mop system. They are manufactured from a 68gsm polyester/cellulose (45% polyester, 55% cellulose) outer cover, which combines the high absorption characteristics of natural fibres with the cleaning and strength of synthetic materials, without the use of chemical adhesives or surfactants. The inner layer is manufactured from 2 sheets of highly absorbent 90gsm paper. Designed to remove contaminants on both flat and uneven surfaces. Supplied sterile for extra protection in pharmaceutical grade environments.

TECHNICAL SPECIFICATION

Manufacture	Optimum Protection
Material	45% polyester, 55% cellulose blend
Sterility	Sterile
Quantity	Pack of 10 Case of 16 x 10
Dimensions	39.5cm x 12.3cm

FEATURES

- 45% Polyester, 55% Cellulose blend
- 68gsm outer layer
- No chemical adhesives or surfactants
- Highly absorbent
- Lightweight
- Convenient
- Sterilised to ISO 11137
- 39.5cm x 12.3cm
