

# TECHNICAL DATA SHEET

## String Mop Head Clamp & Handle

### DESCRIPTION

Our string mops are designed to keep floors clean enough for the high standards of cleanrooms, laboratories, operating theatres, and food production areas. They're also suitable for any other hygiene-critical location. This mop clamp is designed to work with both our microfibre and polyester string mop heads. It is made to a high-quality standard and boasts a quick action release and lock mechanism. The mop pole is fixed length and manufactured from aluminium. These string mops are designed for floor cleaning. We also stock a flat mop system for wall and ceiling surfaces
