## Bulk Handling Clinical Waste Bags

- Yellow or Orange
- UN Approved for Maximum 25Kg
- RID/ADR Approved for Bulk Carriage
- Meets all Legislative Requirements
- Supplied in Rolls

For bulk transportation of infectious waste which is to be taken for incineration or sent for alternative treatment. UN approved for 25Kg and ADR approved for carriage in bulk. Supplied in rolls to fit dispensers.

These bags are required as stated in the European Agreement concerning the International Carriage of Dangerous Goods by Road. Bulk carriage bags enable the transportation of dangerous goods without the use of rigid outer containers in appropriately equipped vehicles.

These bags are not suitable for non-infectious waste, anatomical waste, placental waste, cytotoxic/cytostatic waste or domestic waste.

Bags meet all UN, UK Department of Health and NHS requirements.

Bag Dimensions: 725 x 980mm

Maximum Weight (UN Approved): 25Kg

Thickness: 50mu

Volume: 90L

Orange bags are for alternative treatment or incineration.

Yellow bags are for incineration only.
