## Cytotoxic Spill Kit

- Portable and Lightweight
- Safe
- Efficient
- Conforms to WHO Guidelines
- Ready to Use
- Easy to Keep
- Single Use Packs
- PPE Included

Multi-use, portable and lightweight spill kit for intensive and frequent use on multiple and/or large scale spillages of cytotoxic drugs. High absorbency granules absorb and contain liquid spills. Absorbent pads and sterile water mop up powder spills. A custom solution is provided to neutralise cytotoxic residue of spill site and the surrounding area. A warning sign and colour coded, sealable bags are provided to aid safe disposal.

Used throughout the NHS in hospitals, clinics, surgeries, out-patient departments, pharmacies, laboratories; nursing and care homes and other locations where cytotoxic or chemotherapy drugs are handled and stored. Safe for use by non-specialist staff.

Conforms to UK Department of Health and WHO guidelines for safe clean up of cytotoxic spills.

**Active Ingredient:** Disodium Metasilicate
