

# PRODUCT DATA SHEET

## Multi Layer Tacky Mat

### Benefits:

- Multi - Layer
- No Maintenance
- Removes Dust
- Removes Microbes
- 30 Easy Peel Layers
- Antibacterial

## Product Description

Multi Layer Tacky Mats remove contamination and cleans shoe soles before entry into cleanrooms, laboratories etc. Also ideal for the Construction Industry.

The mat is simply stuck to the floor near an entry or exit door by removing the rear protective backing layer. Each tacky mat layer is then peeled off when dirty to reveal another new layer. Each mat has 30 removable layers. Each layer is coated with a high tack adhesive which removes dust or dirt contamination. An optional floor frame is also available (the frame is re-usable).

**Film contains antibacterial 'PROXEL' LV produced by AVECIA biocides to reduce bacteria growth**

**View our website for Laboratory Reports relating to efficiency of Tacky Mats for removal of particles & microbes**

### SIZES AVAILABLE:

- Small (95cm x 45cm)
- Medium (115cm x 46cm)
- Large (115cm x 66cm)

### COLOURS AVAILABLE:

- Blue
- White

Floor Frames available separately

Note: Must be stored flat away from heat source (5°C to 30°C)
